Ordinary Construction License for Fittings work & Telecommunications work
By Minister of Land, Infrastructure, Transport and Tourism (MLIT)

WHO WE ARE

1928, we have started business by manufacturing rails for net windows that were pretty brand-new idea to the building material industry then, while such are commonly seen nowadays.

Hearing the strong needs for aluminum sashes, we responded by supplying various aluminum extrusions manufactured by our group company YASUDA METAL INDUSTRIES, LTD.

Nowadays, security systems are already vital items in our society. Foreseeing this circumstance, we have established security business more than 10 years ago and now it's running more and more successful.

We will be pleased to respond to your needs and seek for new opportunities that may enrich the quality of living.

OUR BRAND - ASHIBANE

ASHIBANE stands for TALARIA in Japanese, the winged sandals, that the god Hermes, patron of commerce, in Greek myth is used to described together with. Expecting our products with our brand name to be prevalent, we named ASHIBANE that represents the swift, free and boundless movements. Sincerely speaking, we deeply appreciate our collaborating companies for good relationships to establish and expand our branded products. And we will be happy to enrich these relationships and seek for the new opportunities.
